

The American Journal of Occupational Therapy

January/February 2013
Volume 67, Number 1

- 7 **FROM THE DESK OF THE EDITOR AND ASSOCIATE EDITOR**
Quantifying Function: The Rest of the Measurement Story
Barbara M. Doucet, Sharon A. Gutman

Development of quantifiable tools that measure function at a variety of levels is critical to the strength of the occupational therapy profession.

Children and Youth

- 10 **Effectiveness of Occupational Performance Coaching in Improving Children's and Mothers' Performance and Mothers' Self-Competence**
Fiona Graham, Sylvia Rodger, Jenny Ziviani

Occupational performance coaching may improve children's and mothers' occupational performance and mothers' parenting self-competence.

- 19 **Assessing Handwriting Intervention Effectiveness in Elementary School Students: A Two-Group Controlled Study**

Tsu-Hsin Howe, Karen Laurie Roston, Ching-Fan Sheu, Jim Hinojosa

Students engaging in intensive handwriting practice had greater improvements in handwriting legibility than students in a visual-perceptual-motor activity group.

- 28 **Effectiveness of a Physical Activity Intervention for Head Start Preschoolers: A Randomized Intervention Study**

Laura L. Bellows, Patricia L. Davies, Jennifer Anderson, Catherine Kennedy

A program to enhance motor skill performance and increase physical activity, coupled with a nutrition program, had mixed results in a group of preschool children.

- 37 **Life Participation for Parents: A Tool for Family-Centered Occupational Therapy**

Patricia E. Fingerhut

The author reports reliability and validity data for the Life Participation for Parents, an assessment tool to facilitate family-centered pediatric practice.

Rehabilitation, Disability, and Participation

- 45 **Safe-Patient-Handling Equipment in Therapy Practice: Implications for Rehabilitation**
Amy R. Darragh, Marc A. Campo, Lenore Frost, Melissa Miller, Marissa Pentico, Heather Margulis

Occupational therapists reported a range of applications for safe-patient-handling equipment and engage in a complex decision-making process in using the devices.

- 54 **Determinants of Change in Stroke-Specific Quality of Life After Distributed Constraint-Induced Therapy**
Yan-Hua Huang, Ching-Yi Wu, Keh-Chung Lin, Yu-Wei Hsieh, Wilaiwan M. Snow, Tien-Ni Wang

Lesion location, time since stroke, IADL performance, and age are key determinants of quality of life in patients receiving stroke motor rehabilitation.

- 64 **Importance of Tissue Morphology Relative to Patient Reports of Symptoms and Functional Limitations Resulting From Median Nerve Pathology**

Shawn C. Roll, Kevin D. Evans, Xiaobai Li, Carolyn M. Sommerich, Jane Case-Smith

Sonographic measurements may be a useful tool for improving treatment, documenting patient status, and measuring outcomes in carpal tunnel syndrome.

Mental Health

- 73 **Occupational Performance Needs of Young Veterans**
Heidi Lynn Plach, Carol Haertlein Sells

After discharge, veterans face challenges with relationships, school, physical health, sleeping, and driving; occupational therapy can help with reintegration.

- 82 **Self-Development Groups Among Women in Recovery: Client Perceptions of Satisfaction and Engagement**

Suzanne M. Peloquin, Carrie A. Ciro

Self-development activity groups with salient recovery themes appear to be a satisfactory and engaging intervention for women in recovery from substance abuse.

<i>Productive Aging</i>	91	Using Daily Routines to Promote Medication Adherence in Older Adults Martha J. Sanders, Tracy Van Oss <i>Findings from interviews with 149 community-dwelling older adults support the role of occupational therapy in helping clients develop routines for medication adherence.</i>
	100	Prescribers' Experiences With Powered Mobility Prescription Among Older Adults W. Ben Mortenson, Laura Hurd Clarke, Krista Best <i>A qualitative study of prescribers' practices with older adult candidates for powered mobility devices identifies areas for improvement in the provision of powered mobility.</i>
	108	Concurrent Criterion Validity of the Safe Driving Behavior Measure: A Predictor of On-Road Driving Outcomes Sherrilene Classen, Yanning Wang, Sandra M. Winter, Craig A. Velozo, Desiree N. Lanford, Michel Bédard <i>A new screening tool for on-road outcomes among older drivers and their family members—caregivers may help generalist practitioners make decisions about driving.</i>
<i>Departments</i>	117	BRIEF REPORT Development and Reliability of the Autism Work Skills Questionnaire (AWSQ) [ONLINE ONLY] Eynat Gal, Anat Ben Meir, Noomi Katz <i>Preliminary reliability and validity are reported for the Autism Work Skills Questionnaire, a vocational profile for adults with high-functioning autism spectrum disorder.</i>
	118	BRIEF REPORT Reliability of the Health Enhancement Lifestyle Profile–Screeners (HELP–Screeners) [ONLINE ONLY] Jengliang Eric Hwang <i>The author found strong support for the reliability of a 15-item questionnaire that screens for lifestyle behaviors of older adults.</i>
	119	THE ISSUE IS... From Periphery to Player: Strategically Positioning Occupational Therapy Within the Knowledge Translation Landscape Heidi Cramm, Catherine White, Terry Krupa <i>Occupational therapy is on the periphery of knowledge translation, but opportunities exist for the profession to become a key player in this emerging field.</i>
<i>Continuing Education</i>	126	CONTINUING EDUCATION
