

# The American Journal of Occupational Therapy

September/October 2013  
Volume 67, Number 5

- 499 **FROM THE DESK OF THE ASSOCIATE EDITOR**  
**Measuring Function in Chronic Progressive Disorders**  
Ashwini K. Rao  
*Challenges for practitioners include development of reliable and valid assessment tools, effective interventions, and methods to improve intervention adherence; this editorial focuses on selecting assessment tools and measuring function in chronic progressive disorders.*
- Health Policy Perspectives* 502 **Implications of the Affordable Care Act for Occupational Therapy Practitioners Providing Services to Medicare Recipients**  
Gail Fisher, Jennifer Friesema  
*The Affordable Care Act's sections on improving quality and health systems performance for Medicare recipients are likely to have significant implications for occupational therapy.*
- Children and Youth* 507 **Effectiveness of a 10-Week Tier-1 Response to Intervention Program in Improving Fine Motor and Visual-Motor Skills in General Education Kindergarten Students**  
Alisha M. Ohl, Hollie Graze, Karen Weber, Sabrina Kenny, Christie Salvatore, Sarah Wagreich  
*A 10-wk Tier 1 Response to Intervention program in six elementary schools improved the fine motor and visual-motor skills of general education kindergarten students.*
- 515 **Performance-Based Measure of Executive Function: Comparison of Community and At-Risk Youth**  
Joan Toglia, Christine Berg  
*Comparison of at-risk and community youth provided support for discriminant validity of the Weekly Calendar Planning Activity and indicated that the tool can help identify adolescents at risk for occupational performance deficits.*
- 524 **Computer Adaptive Test Approach to the Assessment of Children and Youth With Brachial Plexus Birth Palsy**  
M. J. Mulcahey, Lisa Merenda, Feng Tian, Scott Kozin, Michelle James, Gloria Gogola, Pengsheng Ni  
*A study of the psychometric properties of item pools relevant to upper-extremity function and activity performance found that simulated computer adaptive tests performed comparably to full item banks.*
- 534 **Functional Handwriting Performance in School-Age Children With Fetal Alcohol Spectrum Disorders**  
Cherie J. Duval-White, Tracy Jirikowic, Dianne Rios, Jean Deitz, Heather Carmichael Olson  
*A descriptive study in school-age children provided evidence of functional handwriting challenges for children with fetal alcohol spectrum disorders.*
- Rehabilitation, Disability, and Participation* 543 **Observed Recovery Sequence in Neurobehavioral Function After Severe Traumatic Brain Injury**  
Nataasha A. Lannin, Anne Cusick, Robyn McLachlan, Jeanine Allaous  
*Analysis of the Western Neuro Sensory Stimulation Profile (WNSSP) did not support the current item ordering of the WNSSP as a function of the sequence of recovery from coma.*
- 550 **Minimal Depression: How Does It Relate to Upper-Extremity Impairment and Function in Stroke?**  
Lindy L. Weaver, Stephen J. Page, Lynne Sheffler, John Chae  
*Low levels of depression were not associated with upper-extremity (UE) motor impairment and function in people with minimal to moderate UE disability levels.*
- 556 **Enhanced Task-Oriented Training in a Person With Dementia With Lewy Bodies**  
Carrie A. Ciro, Linda A. Hershey, David Garrison  
*A case study involving the STOMP (Skill-building through Task-Oriented Motor Practice) intervention model suggested that STOMP could serve as a structure for the evaluation and treatment of occupational performance deficits in people with dementia.*
- Productive Aging* 564 **Driving Assessment Tools Used by Driver Rehabilitation Specialists: Survey of Use and Implications for Practice**  
Anne E. Dickerson  
*A survey of 227 driver rehabilitation specialists found no consistency in cognitive assessments or guidelines for behind-the-wheel assessment.*

- 574 **Predicting Older Driver On-Road Performance by Means of the Useful Field of View and Trail Making Test Part B**  
Sherrilene Classen, Yanning Wang, Alexander M. Crizzle, Sandra M. Winter, Desiree N. Lanford  
*A comparison of the Useful Field of View® (UFOV) and Trail Making Test Part B (Trails B) found that the UFOV risk index was a superior test in predicting on-road outcomes, but the Trails B had acceptable accuracy and was comparable to the other UFOV subtests.*
- Education* 583 **Reducing Cognitive Load While Teaching Complex Instruction to Occupational Therapy Students [ONLINE ONLY]**  
Fredrick D. Pociask, Rosanne DiZazzo-Miller, Preethy S. Samuel  
*Instruction designed to reduce cognitive load in teaching complex material may improve instructional efficiency in teaching human locomotion to occupational therapy students.*
- Professional Issues* 584 **DVD Training for Depression Identification and Treatment in Older Adults: A Two-Group, Randomized, Wait-List Control Study**  
Cathy Lysack, Carrie Leach, Theresa Russo, Daniel Paulson, Peter A. Lichtenberg  
*A DVD-based educational intervention to improve mental health knowledge and skills significantly improved practice among occupational therapists working with older rehabilitation patients.*
- Departments* 594 **BRIEF REPORT**  
**Population-Centered Life Skills Groups: Perceptions of Satisfaction and Engagement**  
Suzanne M. Peloquin, Carrie A. Ciro  
*A retrospective analysis of 561 surveys suggested that population-centered life skills groups conceptualized within a holistic Person–Environment–Occupation model are satisfactory and engaging interventions for women in recovery.*
- 601 **BRIEF REPORT**  
**Occupational Therapy Based on Ayres Sensory Integration in the Treatment of Retentive Fecal Incontinence in a 3-Year-Old Boy**  
Isabelle Beaudry Bellefeuille, Roseann C. Schaaf, Eduardo Ramos Polo  
*Sensory integration theory was at the root of an effective intervention to help a 3-yr-old boy with retentive fecal incontinence and sensory overresponsivity acquire age-appropriate toileting habits.*
- 607 **BRIEF REPORT**  
**Household Task Participation for Children With and Without Physical Disability [ONLINE ONLY]**  
Louise Dunn, James Gardner  
*Analysis of household task participation patterns of 46 children and youth with and without physical disability supported the discriminant validity of the Children Helping Out: Responsibilities, Expectations, and Supports measure of household task participation.*
- Centennial Vision* 608 **Five Years Later: Achieving Professional Effectiveness to Move Neurorehabilitation Forward [ONLINE ONLY]**  
Barbara M. Doucet  
*Occupational therapists in the area of neurorehabilitation can develop professional effectiveness by fostering greater academic–clinical alliances, objectifying evaluation and intervention methods, and preparing future practitioners for evidence-driven practice.*

### Erratum

In “Multiple Errands Test–Revised (MET–R): A performance-based measure of executive function in people with mild cerebrovascular accident,” by M. Tracy Morrison, Gordon M. Giles, Jennifer D. Ryan, Carolyn M. Baum, Alexander W. Dromerick, Helene J. Polatajko, & Dorothy F. Edwards, *American Journal of Occupational Therapy*, 67, pp. 460–468, the affiliation for author Giles should be listed as follows:

**Gordon Muir Giles, PhD, OTR/L, FAOTA**, is Professor, Samuel Merritt University, Oakland, CA.
