

The American Journal of Occupational Therapy

March/April 2014
Volume 68, Number 2

- From the Desk of the Editor* 123 **FROM THE DESK OF THE ASSOCIATE EDITOR**
Quantifying Function: Status Critical
Barbara M. Doucet
Occupational therapy practitioners are more appropriately trained for restoring health through meaningful, purposeful activity than practitioners in any other discipline.
- Reports* 127 **Elevating the Quality of Disability and Rehabilitation Research: Mandatory Use of the Reporting Guidelines**
Leighton Chan, Allen W. Heinemann, Jason Roberts
AJOT has joined other major rehabilitation and disability journals in a collaborative initiative to enhance clinical research reporting standards through adoption of the EQUATOR Network reporting guidelines.
- Health Policy Perspectives* 130 **Habilitative Services: An Essential Health Benefit and an Opportunity for Occupational Therapy Practitioners and Consumers**
Daniel Brown
One of the most significant provisions of the Affordable Care Act for the profession of occupational therapy is the requirement that habilitative services be covered.
- AOTA Official Documents* 139 **Announcing the Third Edition of the *Occupational Therapy Practice Framework: Domain and Process***
The third edition of the Framework, available online at <http://otjournal.net>, reflects internal and external changes to occupational therapy practice, emerging concepts, and advances in the field.
- Children and Youth* 140 **Difficulty in Mental, Neuromusculoskeletal, and Movement-Related School Functions Associated With Low Birthweight or Preterm Birth: A Meta-Analysis**
Kinsuk Maitra, Hae Yean Park, Jaime Eggenberger, Angela Matthiessen, Erin Knight, Betty Ng
A meta-analysis of 40 studies found that mental and motor functions in children born low birthweight or preterm appear to have significant effects on school readiness and academic achievement.
- 149 **Effects of Weighted Vests on Attention, Impulse Control, and On-Task Behavior in Children With Attention Deficit Hyperactivity Disorder**
Hung-Yu Lin, Posen Lee, Wen-Dien Chang, Fu-Yuan Hong
A randomized, two-period crossover design study of 110 children with ADHD found some support for use of a weighted vest to remedy attentional and on-task behavioral problems.
- 159 **Potential Predictors of Functional Outcomes After Home-Based Constraint-Induced Therapy for Children With Cerebral Palsy**
Chia-ling Chen, Keh-chung Lin, Lin-ju Kang, Ching-yi Wu, Hsieh-ching Chen, Yu-wei Hsieh
A study of 43 children with CP treated with individualized CIT at home for 4 wk found that visual-motor skills and younger age predicted improvement in functional outcomes.
- 167 **School Function in Students With Down Syndrome**
Lisa A. Daunhauer, Deborah J. Fidler, Elizabeth Will
The strongest predictor of school function may be EF skills, according to a study of 26 elementary students with DS.
- 177 **Activity Participation Among Children With Autism Spectrum Disorder**
Lauren M. Little, John Sideris, Karla Ausderau, Grace T. Baranek
Exploratory factor analysis of the Home and Community Activities Scale was used to derive dimensions of activity participation among a sample of 713 school-aged children with ASD.
- 186 **Relationship Between Play and Sensory Processing: A Systematic Review [ONLINE ONLY]**
Tara Watts, Karen Stagnitti, Ted Brown
A systematic review sheds light on the relationship between play and sensory processing in children aged 3–12.

- Rehabilitation, Disability, and Participation* 187 **Responsiveness of the Manual Ability Measure—36 (MAM-36): Changes in Hand Function Using Self-Reported and Clinician-Rated Assessments**
Christine C. Chen, Orit Palmon, Debbie Amini
In a sample of 46 patients receiving occupational therapy, the MAM-36 correlated positively with improvements in task performance speeds and grip strength.
- 194 **Effects of Partnerships Between People With Mobility Challenges and Service Dogs**
Terry K. Crowe, Suzanne Perea-Burns, Jessica Salazar Sedillo, Ingrid C. Hendrix, Melissa Winkle, Jean Deitz
For adult women with mobility challenges, service dog partnerships may contribute to energy conservation and increase social interactions.
- 203 **Single-Case Design Evaluation of Compression Therapy for Edema of the Stroke-Affected Hand**
Louise Gustafsson, Alexandra Walter, Kylie Bower, Adrienne Slaughter, Melanie Hoyle
A single-case, ABA-design study conducted with 8 participants found that compression bandaging may have benefits in the management of edema after stroke.
- Productive Aging* 212 **Addressing Everyday Challenges: Feasibility of a Family Caregiver Training Program for People With Dementia**
Rosanne DiZazzo-Miller, Preethy S. Samuel, Jean M. Barnas, Keith M. Welker
A manualized intervention protocol is a promising method of equipping family members with the skills to face challenges in caring for people with dementia.
- 221 **Predicting Road Test Performance in Drivers With Stroke**
Peggy P. Barco, Michael J. Wallendorf, Carol A. Snellgrove, Brian R. Ott, David B. Carr
A screening battery that can be performed in less than 5 min was able to assist in the prediction of road test performance in a sample of 72 drivers with stroke.
- Mental Health* 230 **Effects of Object Size on Unimanual and Bimanual Movements in Patients With Schizophrenia**
Shu-Mei Wang, Li-Chieh Kuo, Wen-Chen Ouyang, Hsiao-Man Hsu, Keh-Chung Lin, Hui-Ing Ma
Manual movements of patients with mild schizophrenia and healthy control participants were compared during a bimanual assembly task; results suggest the need for movement rehabilitation in patients with schizophrenia.
- Education* 239 **Comparison of Occupational Therapy Students' Perceived Skills After Traditional and Nontraditional Fieldwork [ONLINE ONLY]**
Sarah Gat, Navah Z. Ratzon
Students who completed community fieldwork in a setting without an active occupational therapist present scored significantly higher in their perception of personal responsibility, cultural competence, and personal skills.
- Departments* 240 **THE ISSUE IS . . .
The Professional Occupational Therapy Doctoral Degree: Why Do It? [ONLINE ONLY]**
Jane Case-Smith, Stephen J. Page, Amy Darragh, Melinda Rybski, Dennis Cleary
The authors present a rationale for the development of professional occupational therapy doctorate programs.
- 241 **CENTENNIAL VISION
Review of Occupational Therapy Intervention Research in the Practice Area of Children and Youth 2009–2013 [ONLINE ONLY]**
Consuelo M. Kreider, Roxanna M. Bendixen, Yu Yun Huang, Yoonjeong Lim
Despite the reductionist nature of intervention research, interventions must reflect the profession's holistic understanding of the interplay among child, environment, and occupation.
- Research Opportunities* 242 **RESEARCH OPPORTUNITIES
Research Opportunities in the Area of Children and Adolescents With Challenges in Sensory Processing and Sensory Integration**
The American Occupational Therapy Association (AOTA) Evidence-Based Practice Project has developed a table summarizing the state of current available evidence on interventions within the scope of occupational therapy practice in the area of children and adolescents with challenges in sensory processing and sensory integration.
