

# The American Journal of Occupational Therapy

March/April 2018  
Volume 72, Number 2

- Health Policy Perspectives*    7202090010    **Using the New Postacute Care Quality Measures to Demonstrate the Value of Occupational Therapy**  
Sharmila Sandhu, Jeremy Furniss, Christina Metzler  
*Occupational therapy practitioners have the opportunity to demonstrate the distinct value of intervention by using the new data items and implementing best practice to achieve optimum outcomes.*
- Research Articles*    7202205010    **Success in Adults With Probable Developmental Coordination Disorder Using Structural Equation Modeling [ONLINE ONLY]**  
Miri Tal-Saban, Asher Ornoy, Shula Parush  
*Probable developmental coordination disorder has direct and indirect influences on daily life activities, executive function, and emotional state.*
- 7202205020    **Occupation-Based Coaching by Means of Telehealth for Families of Young Children With Autism Spectrum Disorder**  
Lauren M. Little, Ellen Pope, Anna Wallisch, Winnie Dunn  
*Occupation-Based Coaching delivered via telehealth appears to be effective in increasing parent efficacy and child participation among families with children with ASD.*
- 7202205030    **Interventions for Women With Substance Abuse Issues: A Scoping Review**  
Alison Leppard, Margaret Ramsay, Andrea Duncan, Cindy Malachowski, Jane A. Davis  
*Women-only substance abuse treatment programs emphasize harm-reduction approaches that target multiple issues, but few target improving clients' occupational repertoires by finding other ways to fill time meaningfully.*
- 7202205040    **Impact of an Activity-Based Program on Health, Quality of Life, and Occupational Performance of Women Diagnosed With Cancer**  
Colleen Maher, Rochelle J. Mendonca  
*A 1-wk activity-based program effectively improves occupational performance and satisfaction and social relationships of community-living women diagnosed with cancer.*
- 7202205050    **Therapy Caps and Variation in Cost of Outpatient Occupational Therapy by Provider, Insurance Status, and Geographic Region**  
Mackenzi Pergolotti, Jessica Lavery, Bryce B. Reeve, Stacie B. Dusetzina  
*Out-of-pocket costs for outpatient occupational therapy vary by location and by insurance coverage; people who are uninsured or underinsured potentially pay the most.*
- 7202205060    **Development of Internet-Based Tasks for the Executive Function Performance Test**  
Debbie Rand, Keren Lee Ben-Haim, Rachel Malka, Sigal Portnoy  
*Two Internet-based tasks developed for the EFPT are comparable to the original EFPT tasks and can be used to assess executive function deficits.*
- 7202205070    **Development of an Item Pool Reflecting Cognitive Concerns Expressed by People With HIV**  
Sorayya Askari, Lesley Fellows, Marie-Josée Brouillette, Carolina Moriello, Martin Duracinsky, Nancy E. Mayo  
*A new 60-item pool can lead to development of a questionnaire to help clinicians better understand areas of perceived cognitive difficulty and plan interventions for people with HIV.*
- 7202205080    **Mirror Therapy and Task-Oriented Training for People With a Paretic Upper Extremity**  
Salvador Bondoc, Julie Booth, Grace Budde, Katelyn Caruso, Michelle DeSousa, Brittany Earl, Kaitlynn Hammerton, Jill Humphreys  
*When used as priming for task-oriented training, mirror therapy can produce clinical improvements in upper extremity function and occupational performance for people with hemiparesis.*

- 7202205090 **Effectiveness of the Co-PID for Students With Moderate Intellectual Disability**  
Efrat Selanikyo, Naomi Weintraub, Shira Yalon-Chamovitz  
*The Collaborative Consultation for Participation of Students With Intellectual Disability (Co-PID) is an effective program for enhancing classroom and school participation.*
- 7202205110 **Goal Attainment and Goal Adjustment of Older Adults During Person-Directed Cancer Rehabilitation [ONLINE ONLY]**  
Kathleen Doyle Lyons, Robin M. Newman, Peter A. Kaufman, Martha L. Bruce, Diane M. Stearns, Frederick Lansigan, Mary Chamberlin, Stephen J. Bartels, Jessica Whipple, Mark T. Hegel  
*Participants in a person-directed intervention to reduce disability and improve QOL met or made progress toward more than three-quarters of the goals they set at the beginning of a 6-wk intervention.*
- 7202205120 **Occupational Therapy in Medicaid Home and Community-Based Services Waivers**  
Carli Friedman, Laura VanPuybrouck  
*Across-state comparisons of Medicaid HCBS waivers for people with IDD identify best practices and can help practitioners advocate for the refinement of state occupational therapy programs.*
- Case Report* 7202210010 **Lighting as a Compensatory Strategy for Acquired Visual Deficits After Stroke: Two Case Reports [ONLINE ONLY]**  
Matthew Green, Beth Barstow, Laura Vogtle  
*Occupational therapy practitioners should consider individual lighting needs as part of the intervention process.*
- Columns* 7202345010 **BRIEF REPORT**  
**Use of the Wilmington Robotic Exoskeleton to Improve Upper Extremity Function in Patients With Duchenne Muscular Dystrophy [ONLINE ONLY]**  
Timothy Estilow, Allan M. Glanzman, Kacy Powers, Ashley Moll, Jean Flickinger, Līvija Medne, Gihan Tennekoon, Sabrina W. Yum  
*Patients with Duchenne muscular dystrophy benefit from use of the Wilmington Robotic Exoskeleton to improve active upper extremity movement and independence in ADLs.*
- 7202345020 **BRIEF REPORT**  
**Effects of Lighting on Reading Speed as a Function of Letter Size [ONLINE ONLY]**  
William Seiple, Olga Overbury, Bruce Rosenthal, Tiffany Arango, J. Vernon Odom, Alan R. Morse  
*Performance on acuity-limited tasks might be improved by brighter lights, but the magnitude of the effect depends on the text size and the relative changes in light level.*
- 7202345030 **BRIEF REPORT**  
**Pilot Study Combining Electrical Stimulation and a Dynamic Hand Orthosis for Functional Recovery in Chronic Stroke [ONLINE ONLY]**  
Barbara M. Doucet, Joni A. Mettler  
*A combined neuromechanical intervention may improve function in persons with chronic stroke.*
- 7202345040 **BRIEF REPORT**  
**Feasibility of a Manualized Occupation-Based Diabetes Management Intervention**  
Kristine M. Carandang, Elizabeth A. Pyatak  
*Clinical research evaluating an occupation-based diabetes management intervention is both feasible to conduct in community-based settings and acceptable to young adults with type 1 or type 2 diabetes.*
- Evidence-Based Practice* 7202395101 **RESEARCH OPPORTUNITIES**  
**Adults With Alzheimer's Disease and Related Neurocognitive Disorder**  
*The AOTA Evidence-Based Practice Project has developed a table summarizing the state of current available evidence on interventions within the scope of occupational therapy practice for adults with Alzheimer's disease and related neurocognitive disorder.*
